Introducing the PC Coach and PC Pod

Smart · Proven · Simple

Two styles of mobile units – endless possibilities.

Planning a large training rollout, interactive road show or just short of IT enabled space? PC Coaching has a range of solutions to meet your needs.

For short stays or projects requiring mobility, we suggest one of our three different PC Coach models. Longer stays benefit from the unique, spacious environment of our PC Pod.

Step onboard our units...

Notice the quality of the environment – fully-equipped, ergonomically- designed workstations, climate control, high specification PCs - all the tools to successfully deliver your learning event or software demonstration.

Real cost savings...

The added convenience for delegates by taking the event to them - and the simplicity this offers organisers - are just some of the benefits our clients regularly highlight.

PCCoach

When you need to frequently change location, a PC Coach is perfect.

There's three types to choose from and a variety of seating and layout options accommodating 8 -10 delegates.

Within minutes of arriving on-site, a PC Coach is powered-up and ready to go. Like all of our mobile units, they can quickly connect to your network or the internet - with the added convenience of using their own onboard generators if required.

The PC Coaches are great for road shows too. With your own livery applied, you will never fail to make a big impression.

Some vehicles are suitable to be driven by your own team, giving you the ultimate flexibility.

PC Coach

PC Pod

PCPod

When you need a week or longer in one location, the PC Pod is the stylish, cost-efficient solution.

With its relatively small footprint, but cavernous interior, it is easily manoeuvred into the tightest of spaces.

The raised trainer/presenter area includes a large plasma display and access to a full suite of audiovisual equipment.

Up to 10 delegates sit in complete comfort - and like all of our units the onboard IT can speedily connect to your network and power supply.

Every aspect of the set-up is cared for by our operations team, which provides reliable 24/7 support.

The PC Pods have proven extremely popular with our clients requiring a solution for a week, a month, a year - or even longer.

What do I get?

All our units are fully climate-controlled, with ergonomic workstations and seating, high specification HP PCs, plus a choice of presentation tools.

The daily rate includes all the essential technical support to configure the onboard IT to your specific requirements with the vital back-up to deliver and set up each unit on-site.

PC Pod interior

How much?

Our simple pricing structure lets you easily calculate costs.

With two elements - a variable daily rate for the unit depending on booking type and duration, and a moving charge for each time a unit is delivered or collected.

What isn't included?

Not much. We can provide internet access via satellite or 3G (minimal daily tariff). If you need to use the onboard generators on the PC Coaches or have us provide a stand alone unit for the PC Pods there is a daily charge that includes the cost of the fuel.

What Next?

If you haven't been aboard one of our units, call us to arrange a demonstration or to receive our rate card, case studies and technical data. We are also only too happy to put you in touch with our clients to hear firsthand how they have benefited by working with us.
